

SACHIN SURESH

AI Governance & Knowledge Management Lead | Cybersecurity Governance | Information Architecture

Abu Dhabi, UAE | +971 58 535 5315 | sach7411.uae@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Governance, Knowledge Management and Technical Documentation leader with 10+ years of experience across cybersecurity, enterprise technology, robotics and software environments in the UAE, Japan and India. Experienced in developing governance frameworks, operating standards, SOPs, lifecycle processes, information architectures, workflow models and controlled knowledge systems.

Skilled at translating complex technical and operational requirements into scalable governance processes while partnering with cybersecurity teams, engineers, SMEs and leadership. Currently expanding specialization into Responsible AI, AI governance, risk and controls.

CORE EXPERTISE

Governance & Controls: Governance Frameworks • Operating Models • Policies & SOPs • Cybersecurity Governance • Risk & Control Documentation • Roles & Accountability

Knowledge & Information Governance: Knowledge Management • Information Architecture • Taxonomy & Classification • Controlled Repositories • Content Lifecycle • Version & Change Management

Process & Transformation: Process Architecture • Workflow Modelling • Lifecycle Frameworks • Escalation Workflows • KPI & Performance Management • Process Improvement

Technical & Enterprise Platforms: SharePoint • Confluence • Jira • ServiceNow • Git/GitHub • Markdown • REST APIs • Swagger/OpenAPI • Postman • Power Automate • Draw.io • Visio

PROFESSIONAL EXPERIENCE

Lead Technical Writer / Knowledge Governance Specialist

Help Information Technology | Client Engagement: Major UAE Energy Enterprise | Abu Dhabi, UAE | Sep 2025 – Present

- Develop governance frameworks, operating standards, SOPs and lifecycle documentation supporting enterprise cybersecurity operations and alignment with organizational, NIST- and ISO-oriented security practices.
- Translate complex cybersecurity requirements and SME inputs into structured governance artifacts covering roles and responsibilities, escalation paths, process stages, decision points and operational controls.
- Design and maintain process frameworks covering threat-management lifecycles, intelligence workflows, response procedures and escalation models, strengthening consistency and traceability across technical teams.
- Model end-to-end operational workflow diagrams for security monitoring, exposure management, incident-response and third-party scenarios, converting complex technical activities into executable operational models.
- Architect structured SharePoint knowledge repositories covering governance frameworks, standards, SOPs, processes, lifecycle documentation, workflows and performance artifacts to improve information organization and discoverability.
- Establish KPI frameworks, measures of effectiveness, evidence-tracking structures and operational reporting mechanisms supporting governance oversight, review readiness and continuous improvement.

Lead Technical Writer / Technical Documentation Specialist

Rapyuta Robotics | Tokyo, Japan | Apr 2022 – Aug 2025

- Developed developer documentation, deployment guides, technical manuals, operational procedures and API/integration content for robotics software and automation platforms.
- Partnered with engineering and product teams to understand complex platform architecture and translate technical implementations into structured developer and operational knowledge.
- Managed documentation through Git-based/docs-as-code workflows, structured technical reviews, version control and change-management practices aligned with software releases.
- Developed installation, troubleshooting, onboarding and operational workflows supporting product deployment, adoption and knowledge transfer across globally distributed teams.

Senior Associate Technical Writer

Ernst & Young (EY) | India | Jun 2020 – Apr 2022

- Developed structured enterprise documentation covering business processes, operational workflows and technical procedures within a consulting environment.
- Partnered with SMEs and stakeholders to capture complex business and technical requirements and translate them into standardized, usable process documentation.
- Conducted documentation reviews to identify gaps, inconsistencies and opportunities for standardization, improving clarity, maintainability and knowledge transfer.

Technical Content Developer

Dell EMC | India | Feb 2019 – Jun 2020

- Developed enterprise-grade technical documentation for infrastructure, integration and operational platforms, translating complex system behavior into structured user and operator guidance.
- Collaborated with technical teams to document system workflows and operational processes with a focus on accuracy, reliability and maintainability.

Senior Software Engineer & Technical Writer

Happiest Minds Technologies | India | Nov 2014 – Jan 2019

- Developed user guides, technical procedures, FAQs and system documentation supporting enterprise applications and software solutions.
- Supported documentation standardization initiatives covering structure, templates, review practices and content consistency across technical deliverables.

TOOLS & TECHNOLOGY

Governance & Knowledge: SharePoint • Confluence • ServiceNow • Jira • Knowledge Repositories • Information Architecture • Taxonomy • Content Lifecycle

Technical Documentation: REST APIs • Swagger/OpenAPI • Postman • Markdown • Git/GitHub • Developer Documentation • Technical Procedures

Visualization & Collaboration: Draw.io • Visio • Notion • Microsoft 365

Process & Automation: Power Automate • Microsoft Planner • Workflow Design • Process Mapping • KPI Tracking • Evidence Management

CERTIFICATIONS

REST API for Technical Writers • Microsoft Dynamics 365 • Artificial Intelligence Governance Professional (AIGP) — In Progress • NIST AI Risk Management Framework (AI RMF) — Applied Learning

EDUCATION

Master of Computer Applications (MCA) – RNS Institute of Technology, India | 2015

Bachelor of Computer Science – Sri Bhagawan Mahaveer Jain College, India | 2011

GLOBAL EXPERIENCE & LANGUAGES

International Experience: UAE • Japan • India

Languages: English – Fluent • Japanese – Basic • Arabic – Learning
